

MICRON SUBCON

PRECISION ENGINEERING

MACHINING EXCELLENCE

Who we are

We are a well-established Precision Engineering company, with a proven track record of providing quality machined components to a diverse range of industries. We have a long standing customer base and welcome new clients regularly. We pride ourselves in offering an exemplary level of service, meeting ever increasing demands and tight deadlines.

Our policy

Our policy of continuous investment into the latest CNC machinery & technology means that we can now offer a more complete service - from design and prototyping through to any volume of production.

Customer first

We respond positively to our client's requirements and aim to deliver a high quality professional service, in a reliable and efficient manner, at competitive prices.
